There is currently a debt crisis in the Eurozone (that is, countries that use the Euro, the European single currency), with some countries in the Eurozone unable to pay their debts without help. Unless they are given assistance it is likely they would have to default on their debt payments, which would risk bringing down European banks and causing another economic crisis. Countries in Europe are currently discussing further ways of bailing out countries in difficulties or protecting the European banks.

Some people think Britain should contribute money to help solve the debt crisis in the Eurozone. Other people think Britain has its own economic problems to address and that countries within the Eurozone should carry the cost.

Which of the following best reflects your view?

Britain is not in the Eurozone and has its own problems. We should not contribute any money to help solve the debt crisis	63	74	55	52	75	59	54	60	65	46	56	69	68	59	67	58	65	61	64	60
