Under the new rules child benefit will be withdrawn from households with a higher rate taxpayer, that is, where one person in the family earns around £42,000 a year or more. It would still be payable to families with two basic rate taxpayers, even if their total income was more than £42,000. Do you think this is fair or unfair?

This year sees the introduction of the new system of tuition fees in England. Under the new scheme, students will not have to pay tuition fees up front, but will pay them through a student loan which they will have to pay back after graduation once they are earning over £21,000 a year. Most universities are charging fees of between £8000 and £9000 a year.

Do you support or oppose the new system of tuition fees?
