1. Interest in news and public affairs

Some people seem to follow what's going on in government and public affairs most of the time, whether there's an election going on or not. Others aren't that interested. Would you say you follow what's going on in government and public affairs...?

11. Reasons for career differences between men and women – Women are not taken seriously in the workforce after having children.

On average, women who are working earn less than men, and make up a much smaller percentage of CEO's and high-level managers. Below are some possible explanations for why this happens. For each statement, please tell us to what extent you agree that it is a cause for salary and career rank differences between men and women. (A) A major cause of salary differences between men and women; (B) A minor cause of salary differences between men and women; (C) Not a cause of salary differences between men and women

29. Surveillance cameras in public places

Some people think installing video surveillance cameras in public places is a good idea because they may help to reduce the threat of terrorism. Other people think this is a bad idea because surveillance cameras may infringe on people's privacy rights. Which comes closer to your view? Would you say it is more of a good idea or a bad idea to install surveillance cameras in public places?

The Economist/YouGov Poll

May 4-6, 2013

Sponsorship	<i>The Economist</i>
Fieldwork	YouGov
Interviewing Dates	May 4-6, 2013
Target population	U.S. citizens, aged 18 and over.
Sampling method	Respondents were selected from YouGov's opt-in Internet panel using sample matching. A random sample (stratified by age, gender, race, education, and region) was selected from the 2010 American Community Study. Voter registration was imputed from the November 2010 Current Population Survey Registration and Voting Supplement. Religion, political interest, minor party identification, and non-placement on an ideology scale, were imputed from the 2008 Pew Religion in American Life Survey.
Weighting	The sample was weighted using propensity scores based on age, gender, race, education, news interest, voter registration, and non-placement on an ideology scale. The weights range from 0.1 to 7.1, with a mean of one and a standard deviation of 1.26.
Number of respondents	1000
Margin of error	± 5% (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	17 questions not reported.
