28. Full body scanner machines at airports

Full body scans produce detailed pictures of travelers and items that are hidden on their bodies. It might have detected the explosives that were meant to be ignited on the Northwest flight from Amsterdam to Detroit last Christmas. But many privacy advocates have objected to them. The scanners would not detect items within a person's body. What is your opinion of the use of full body scanners at airports?

The Economist/YouGov Poll

November 27-30, 2010

Sponsorship	<i>The Economist</i>
Fieldwork	YouGov
Interviewing Dates	November 27-30, 2010
Target population	U.S. citizens, aged 18 and over.
Sampling method	Respondents were selected from YouGov's PollingPoint panel using sample matching. A random sample (stratified by age, gender, race, education, and region) was selected from the 2005–2007 American Community Study. Voter registration, turnout, religion, news interest, minor party identification, and non-placement on an ideology scale, were imputed from the 2008 Current Population Survey Registration and Voting Supplement and the Pew Religion in American Life Survey. Matching respondents were selected from the PollingPoint panel, an opt-in Internet panel.
Weighting	The sample was weighted using propensity scores based on age, gender, race, education, news interest, voter registration, and non-placement on an ideology scale. The weights range from 0.6 to 4.1, with a mean of one and a standard deviation of 0.58.
Number of respondents	1000
Margin of error	± 3.6% (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	34 questions not reported.
