The government are currently planning to reform the NHS in England. Currently health services are commissioned by local Health Trusts. Under the government's plans local Health Trusts would be abolished, and health services would instead be commissioned by consortiums made up of groups of local GPs.

From what you have read or heard about these plans, do you support or oppose these proposals?

In recent years many celebrities or public figures have taken out injunctions preventing the press from reporting stories about their private lives, which celebrity is involved and sometimes even the existence of the injunction.

Some people think this is an unacceptable infringement on the freedom of the press, other people think it is an acceptable means for people in the public eye to protect their privacy. Which of the following best reflects your view?
