15. Civil union for all couples

Some people think that marriage is a religious institution that should not require government recognition. Instead, governments should allow any committed couple, whether heterosexual or homosexual, to enter into a civil union, giving all couples the same legal rights and responsibilities. Do you agree or disagree with this point of view?

31. Support for reducing number of votes needed to break filibuster

There has been discussion about reducing the number of votes necessary to stop debate and force a vote on a bill from 60 Senators to a simple majority of 51. This would prevent a minority of Senators from staging a filibuster - a practice used to block passage of a bill. What do you think? Should the number of votes needed to end a filibuster be reduced to 51?
